

AIGLON
Switzerland

Scholarships

2020 - 2021

Fully Funded Scholars

Aiglon offers scholarships to students in the two year IB Diploma programme with a small number of awards also covering pre-IB years.

From **12** Countries

16
scholars

John Corlette, Aiglon's founder, started what is now a seven decade tradition of offering need based scholarships to talented students. The generous philanthropic support we receive from within our community enables our commitment to grow and create even greater impact.

Our Scholars

"I am more confident in myself and my abilities because Aiglon has equipped me with the right skillset and mindset to take on my next steps in life. I am hoping to study International Business and Corporate social responsibility. I would like to

make contributions to sustainability in business worldwide, but I am concerned with Zimbabwe's failing business sector and would like to research ways to improve it."

Joanne Chitoro (Exeter, 2021)

Our Partners

Underpinning our programme are the longstanding relationships with trusted institutions around the world which nominate potential candidates for the selection process. Our partners include the Starehe Boys Centre and School and the Starehe Girls Centre in Kenya, the Jay Pritzker Academy in Siem Reap, Cambodia, and the Royal Academy in Bhutan. Our newest partner, the Horizons Program, works to empower promising Palestinian students in Jerusalem.

University placement

100%

of our scholars go on to university, many with full funding packages to universities such as:

Imperial College London, Yale University, Stanford University, Cambridge University, Georgetown University, University of British Columbia, Claremont McKenna College, and Middlebury College.

Funding levels

Opportunities to support the scholarship programme exist for all levels of donors:

- Establish a named fund to support multiple scholars for CHF 1'000'000 to 5'000'000+
- Fully fund the two-year programme for one scholar for CHF 275'000
- Half fund of the two-year programme for CHF 137'500
- Partially fund one year of the programme for CHF 67'500
- All other scholarship gifts are pooled to offer places to deserving students; every gift counts toward building the fund to offer more places

A life changing experience with lasting impact

The compounding effect of scholarship gifts goes far beyond Aiglon, impacting scholarship recipients and their families, their classmates, and the wider community into which they enter after graduation.

The reality is that our scholarship programme is about both investment and innovation. Scholars raise the bar for all students, in the classroom and in their eagerness to make the most of their Aiglon experience.

They nourish Aiglon's identity as a school where students remain well-grounded and values-focused. They also bring to our community diverse perspectives and experiences that enrich us all.

Watch Aiglon Journeys, a student made video in which our scholars speak about their Aiglon experience.

Štěpán
(Alpina, 2015)

"Every step I take is shaped by the values I adopted at Aiglon."

"Post Aiglon, I studied Aerospace Materials engineering at Imperial College London. Aiglon provided an amazing starting position. Thank you to the donors who made it possible."
